

クスリウコン

KUSURI-UKON 50

*Another High-purity Plant Extract From Javaplant,
Condition-specific Manufactured.*

Kusuri-Ukon 50 is made of Temulawak extract-concentrated Xanthorrhizol.

Temulawak yields to 4-5% of Temulawak oil whose main constituents are Xanthorrhizol (approximately 50%).

Xanthorrhizol is triple purified to improve the color of the oil (from brown to light yellow), enrich the xanthorrhizol, remove the undesired curcumins and reduce the strong odour without altering the efficacy of the product.

Kusuri-Ukon 50 is conveniently available in oil, standardized to at least 50% Xanthorrhizol for a specific manufacturing application.

Ask for a free sample of Kusuri-Ukon 50 today and find out if Kusuri-Ukon 50 is right for your manufacturing application needs.

Kusuri-Ukon 50 is best applied in soft capsules and flexible to be co-administered with other ingredients. Kusuri-Ukon 50 is also best intended for skincare products.

Kusuri-Ukon 50 is scientifically tested and verified to meet the highest quality, safety and efficacy standards.

Javaplant
